Game name

- Neon Spin
  - Chinese translation: TBD
- Mega Wheel is a temporary name; **don't** use this name

Key concept

- Client requested a simple game like Mega Wheel
- Indonesia is the primary market
- Straightforward, lucky wheel game
- Simple scenario, no bonus game
- Main background + bonus background (just adjusted colours or adding extra visual effects)

Gameplay

- Players can bet on:
  - numbers
  - mystery gift
- Extra random multipliers are drawn to each game round
- Mystery gift
  - Triggered when the wheel stops on the special element
    - 3 boxes with multipliers
  - Players can pick one box > decision element to enhance gameplay
    - If a player doesn't pick a box within the allocated time, the system will pick a random box for them
    - Most picked box will open OR each player will get their chosen box/multiplier TBC
    - System will also show the other multipliers in the left boxes
  - Every player with valid bets on the mystery box in the current game round is eligible to take part

Wheel distribution

- 54 total segments
- 8 Mystery segments (≈14.81% hit rate)
- 46 Regular segments (numbers + colours)

Multiplier	Segments
1x	18
2x	12
5x	8
10x	8
Mystery box	8
Total	54

Colour distribution

- Please note that the colours are just decorative and don't affect the gameplay at all
- 45 regular segments ÷ 4 ≈ 11–12 each
- Distribution:
  - Red: 11
  - Blue: 11
  - Green: 11
  - Yellow: 12
  - Mystery segments are **colour-neutral**

Bonus distribution

- Randomly distributed to 1 or 2 segments each game round
- Does not apply to Mystery Gift

Multiplier	Weight
2x	20
3x	18
4x	15
5x	12
7x	10
10x	8
15x	6
20x	5
25x	3
50x	2
100x	1

Mystery Box

- Activated when the lucky wheel stops on one of the Mystery Box segments
- The system will assign 3 multipliers
- Players can pick only one
- Selection time is the same for all players; If a player misses the selection time, the system will select one box randomly on behalf of the player
- Outcome:
  - Option 1:
    - When the selection time is over the most selected box will reveal the multiplier inside
    - All players receive the same multiplier x their bet
  - Option 2:
    - When the selection time is over the chosen multiplier will be revealed
    - Each player will be rewared according to their chosen multiplier
- The remaining boxes will also be opened and reveal the other multipliers

Multipliers available inside the Mystery Boxes:

Multiplier	Weight
5x	20
10x	18
15x	15
25x	12
40x	10
75x	8
125x	5
250x	2

Return to Player

Expected to be around 97%

RTP Breakdown:

- ~65% RTP from regular numbers
- ~32% RTP from Mystery Gift
- ~0.5–1% from round multipliers
- Final total ≈ 97%

Technical feasibility check

- Selction time: 5 seconds
  - 3 boxes containing one multiplier each
  - low, mid and high
  - players will pick their favourite box
  - Outcome
    - Option 1: the most selected box will contain the same multipliers for all players
    - Option 2: player is rewarded the multiplier inside the chosen box

Operational details

- Concept: Mid Jan 2026
- Design:
- Development: expected to start as soon as Mahjong Drop is done
- 4-5 months project
- Go-live date: end of Q2 2026
- Hosted from Malta studios, not Religa

Lucky wheel model

- Simple, printed patterns. Quick lead time, cost-effective
- Standard wheel with LED in the middle only
- No Unreal Engine assets

Pragmatic Play Mega Wheel features for reference

- 54 wheel segments
  - 1, 2, 5, 8, 10, 15, 20, 30, 40
- Wheel distribution
  - 20x 1
  - 13x 2
  - 7x 5
  - 4x8
  - 4x 10
  - 2x 15
  - 2x 20
  - 1x 30

    - 1x 40
- A multiplier is applied to the game round before the wheel is spun and it replaces the payout value for the number selected
- There are no bonus rounds
- Max payout: 500x, RTP: 96.51% minimum
- Autoplay function, bet on all function
- 11s betting time
- Max payouts per multiplier
-

Refs	Remarks
	The background should work together with the wheel Some ideas: The Beauty of Fractal Geometry (#SoME2) The wheel should have 54 segments (guidelines on betting spots to be confirmed soon)
	The betting area should have 9 betting spots • 4 colours • 4 shapes • 1 special element Players will be able to bet on individual spots or combinations of them Multipliers will be added to each spin to certain betting spots
